Ammunition Depot at Toepchin

Legend to sketch of Zone No 2 of the Ammunition Depot at Toepchin

- 1 Surface concrete ammunition bunkers, about 12 x 8 meters, with a slanting roof and a loading ramp in front of each bunker. The bunkers were spaced about 40 meters apart.
- 2 Underground concrete ammunition bunkers, covered with a layer of earth, grass and small pine trees. The bunkers were spaced about 25 meters apart.
- 3 Work Building I, a cinder-block building, about 55 x 18 meters, with a cement span-roof. Shells were cleaned there.
- 4 Work Building II, empty.
- 5 Work Building III, with two large rooms in which shells were cleaned and a small room with two old German lathes in operation, driven by a 3-hp engine.
- 6 Work Building IV, about 60 x 20 meters, used for the storage of wooden crates, 50 to 55 cm in diameter, which allegedly contained shells weighing about 100 kg each.
- 7 Work Building V, about 40 x 20 meters.
- 8 Packing Shed No 3, about 60 x 20 meters, of three rooms in which boxes of about 70 x 100 cm were stored, each box allegedly contained 2 shells and 2 cartridges.
- 9 Packing Shed No 4, with 2 empty rooms and 1 used room.
- 10 Packing Shed No 5, empty.
- 11 Cinder-block building with span roof, used as garage for a tractor of Unit Shavalle, (fnu), after it had served as storeroom for shell-casting compound until 1945.
- 12 Building of about 4 x 6 meters, used for the storage of cleaning rags, oil and grease.
- 13 Empty wooden bunkers, 2 x 1 meters, with slanting shingle roofs, which had been used for the storage of air force ammunition until 1945.
- 14 Former packing sheds, allegedly empty, near the observation tower.
- 15 Observation towers.
- 16 Wire fences.
